

STATE OF HAWAII
REQUEST FOR SOLE SOURCE

'03 OCT 20 P2:36

TO: Chief Procurement Officer
FROM: DLNR/Kaho'olawe Island Reserve Commission
(Department/Division/Agency)

STATE PROCUREMENT OFFICE
STATE OF HAWAII

Pursuant to §103D-306, HRS, and Subchapter 9, Chapter 3-122, HAR, the Department requests sole source approval to purchase the following:

Description of goods, services, or construction:

Transfer of Kaho'olawe Island Geographical Information System/Data Management System (KIGIS/DMS) from US Navy's Contractor Parsons/UXB to Kaho'olawe Island Reserve Commission including,

- a) Database Installation and Data Migration
- b) Web Mapping Application Migration and Customization
- c) Onsite Installation Support
- d) Technical Support Services and Maintenance

Name of Vendor: FARALLON GEOGRAPHICS, INC

Cost: \$94,900

Address:

609 Mission Street, 2nd Floor
San Francisco, CA 94105

Phone: (415) 227-1140
Fax: (415) 227-1148

Term of Contract:

From: 12/1/03

To: 12/1/04

Prior Sole Source Reference No.:

The goods, services, or construction has the following unique features, characteristics, or capabilities:

The KIGIS/DMS is a unique GIS/Database system that has been developed by US Navy's Kaho'olawe Unexploded Ordnance Cleanup Contractor, Parsons/UXB as a tool to manage the Unexploded Ordnance Cleanup project. It is the central database that contains information on geography, environment, historic property, and unexploded ordnance on Kaho'olawe and serves as the central record of the the unexploded ordnance clearance work carried out on the island. Information contained in the KIGIS/DMS will be critical for future management of the island by the KIRC.

Farallon Geographics, Inc. developed the KIGIS/DMS system under subcontract with Parsons/UXB and has the unique information and expertise required to transfer the system to the KIRC. These unique qualifications include the specific knowledge and information on the database connectivity, architecture, structure, and application code. The system contains unique application code/modules developed by Farallon to establish connectivity between the database and user-interface.

REQUEST FOR SOLE SOURCE (Cont.)

How the unique features, characteristics, or capabilities are essential for the agency to accomplish its work:
 The KIGIS/DMS is the central database containing all geo-spatial information relating to geography, environmental resources, cultural resources, and unexploded ordnance clearance on Kaho'olawe. Information contained in the KIGIS/DMS will be critical in implementing the KIRC Access and Risk Management Plan and future management of the reserve.

Farallon Geographics Inc. developed the KIGIS/DMS system and has the unique capability to effectively transfer the system to the KIRC in a timely manner that will preserve the architecture, structure, and connectivity of the database including application code/modules.

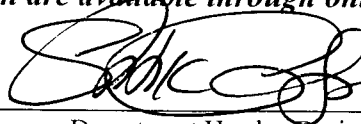

The following other possible sources for the goods, services, or construction were investigated but do not meet our needs because:

Transfer of the KIGIS/DMS requires detailed knowledge of the system architecture and structure that only the developer of the system possesses. An outside consultant besides Farallon Geographics Inc. will have to undertake extensive training and research on the system before being able to migrate the system without loss or impact to the data integrity.

Direct questions to: Deepak Neupane, PE

Phone: (808) 586-0761

I certify that the information provided above is to the best of my knowledge, true, correct and that the goods, services, or construction are available through only one source.
